

# Name of the App: SecondBrain

## 1- Description:

SecondBrain is an intelligent assistant powered by a Large Language Model (LLM). It allows you to provide a folder filled with documents, notes, or resources, and then interacts with you through a simple interface. By understanding your files, the app can generate quizzes, answer questions, and solve problems based on the knowledge it learns from your data.

## 2- Functionalities:

- Upload a folder of documents, notes, or resources for the AI to learn from.
- Search and retrieve information directly from your uploaded content.
- Generate quizzes and practice questions based on your notes.
- Answer specific questions using only the data you provided.
- Provide solutions or insights tailored to the uploaded material.
- Interactive prompt window to ask anything related to your data.

## 3- Team members:

- Mohamed Amine El Kalai
- Youssef Guerairate
